(54) Title: OPERATIONS PANEL AND IMAGE FORMING APPARATUS

(57) Abstract: An operations panel is disclosed that comprises plural operations blocks attached to a main body of an electronic apparatus; a selection information output unit that outputs a selection information item indicating a selection item selected in the operations block; a display operations block that is removably attachable to the main body, including a display unit that shows display selection items used for selecting operational functions, a selection detecting unit that detects the selected display selection item, and a display control unit that causes the display unit to show the selection items corresponding to the operations blocks together with the display selection item when the display operations block is removed from the main body; and a selection information retrieving unit that retrieves, as the selection information item, a selection result detected by the selection detecting unit of the display operations block removed from the main body.
